

Bug ID: 003

Title: Cursor changes to system default when hovering over dropdown options

Description: When opening the dropdown lists for "Choose the kingdom your character comes from," "Choose character's faith," and "Goals and motivations of your character" and hovering over any option, the mouse cursor changes to the system default cursor instead of the customized cursor used on the website.

Steps to Reproduce:

1. Open the character creation page.
2. Click on the dropdown list for "Wybierz królestwo skąd pochodzi twoja postać"
3. Hover over any option in the dropdown list.
4. Repeat steps 2-3 for the dropdown lists "Wybierz wiarę postaci" and "Cele i motywacje twojej postaci"
5. Observe the cursor change.

Expected Behavior: The cursor should remain the customized cursor used on the website when hovering over any option in the dropdown lists.

Actual Behavior: The cursor changes to the system default cursor when hovering over any option in the dropdown lists.

Environment:

- Browser: Google Chrome 91.0.4472.124
- Operating System: Windows 10
- Device: Dell XPS 13 Laptop

Attachments: N/A

Priority: Medium

Additional Information: The issue appears to be related to the CSS styles applied to the dropdown list options..
